3. Scope

The Resiliency Subcommittee of TC 2.10: Resilience and Security aims at promoting technical excellence in resiliency through a holistic approach intended to advance both the state of the art and current practice.

4. Announcements/Discussion

Three focal points of this subcommittee are i) develop overarching guidelines for technical activities related to resiliency including coordinating with other technical organizations, government, industry, and academia ii) identifying gaps in knowledge concerning HVACR resiliency and proposing solutions, and iii) ensuring coordination/compatibility amongst ASHRAE content and activities regarding resiliency. On these topics, the scope of this subcommittee includes identifying and sponsoring research projects, evaluating existing technologies, providing recommendations for developing ASHRAE standards to provide guidance to building operators and practicing engineers, and organizing programs to disseminate research findings and technical/practical advancements among ASHRAE members.
